PROFESSIONAL PROFILE

State Engineer in Computer Science graduated from EHTP (June 2026), I am seeking a first position to contribute to the design of innovative technical solutions within a dynamic and quality-oriented team. With experience in Full-Stack development, microservices architecture and DevOps deployment, I have led several projects from requirements analysis to production: from Spring Boot/Kafka APIs to React/TypeScript interfaces, through Flutter and Laravel, with integrated AI (Computer Vision) and Docker/Compose orchestration.

EDUCATION

École Hassania des Travaux Publics –CASABLANCA, 2023 - 2026
State Engineer in Computer Science (graduated June 2026).
Classes Préparatoires aux Grandes Écoles –AGADIR 2021 - 2023
Mathematics, Physics, and Engineering Sciences (MPSI).
Lycée Ibn Soulaïmane Roudani –TAROUDANT 2018 - 2021
Bachelor’s degree in Mathematical Sciences.

PROFESSIONAL EXPERIENCE

CID Développement (Casablanca) – PFE Internship – Full-Stack Engineer Feb – Jun 2026
SiteSafe AI — Intelligent HSE Supervision Platform using Computer Vision
• Full microservices architecture: Spring Boot backend (JWT, Kafka, PostGIS), React/TypeScript frontend (Vite), Python AI service (RT-DETR/YOLO), MinIO storage
• Real-time detection of PPE violations (helmet, vest, gloves, safety shoes); incident lifecycle management with validation workflow and WebSocket notifications
• Full Docker containerization, Scrum methodology (sprints)
OPTIZAWORKS (Agadir) – Engineering Internship – Full-Stack Developer Sept – Nov 2025
Development of an inventory and supply management application
• Design and implementation of a complete web application (Laravel backend (REST API) + Vue.js frontend)
• Management of items, stock movements, and automatic generation of entry/exit slips
OHSE CAPITAL (Laâyoune) – Engineering Internship Jul – Sept 2025
Multi-user HealthTech Mobile Application (OSHApp)
• Business requirements analysis, medical appointment management, notifications and HR/HSE/Nurse/Doctor communication integration
• Spring Boot backend (REST API, JWT), Flutter/Dart frontend, Docker containerization
• Figma mockups, GanttProject planning, GitHub version control
Marolet (Meknès) – Introductory Internship – Web Developer Jul – Aug 2024
Optimization of the Behost.ma website
• WordPress website UX/UI redesign: improved navigation, reduced bounce rate by 30%
• Security: plugin updates
• Creation of visual assets (banners, infographics) with Canva for marketing campaigns
Extracurricular Activities:
• Design Lead of the EHTP Social Club for the academic year 2024–2025
• Graphic design and creation of visual assets for all club activities, with participation in major projects such as the Caravan and the Social Forum (2024–2025 edition), using Canva, Photoshop, and Illustrator.

TECHNICAL SKILLS

Programming Languages & Frameworks : Python, SQL, C, C++ , Java, C#, ASP.NET, React.js, TypeScript, Flutter (Dart), Spring Boot, Laravel
Web Development : HTML, CSS, Bootstrap, JavaScript, XML
Databases & Tools : MySQL, MongoDB, PostgreSQL, PostGIS, SQL Server, Apache Kafka, MinIO, Git/GitHub, Docker, Linux/Unix
Methodologies & Project Management : UML, Merise, Agile/Scrum, GanttProject, ClickUp, Trello
Other Tools : Excel, Word, PowerPoint, Power BI, Figma, Canva, Adobe Photoshop, Adobe Illustrator

LANGUAGES

Tamazight : Native Language Arabic : Fluent French : Advanced English : Intermediate

NOTABLE PROJECTS

• Kit Commun Hospitalier : Microservices architecture (Spring Boot, Docker Compose) ; integration of a Blockchain layer for medical records security and traceability
• Flight Booking App : ASP.NET Core MVC, C#, Bootstrap, SQL Server
• J2EE Inventory Management : Java, centralized product/warehouse management
• Android Task App : Java, simple and user-friendly interface
• Linux Server : HTTP, SMTP, and LDAP protocols
• Hex/Moulin Games : C, basic AI (A* algorithm)
